

WAUKESHA COUNTY PUBLIC HEALTH DIVISION

2004 FLU SHOT CALENDAR

Due to the National Flu Vaccine shortage, the US Centers for Disease Control and the State of Wisconsin are limiting the Flu Vaccine to persons who are high risk for serious complications of the Flu.

Target Groups for Vaccination in 2004 Include:

- Children age 6-23 months
- Persons aged ≥ 65 years
- Residents of nursing homes and other chronic-care facilities
- Adults and Children who have chronic disorders of the pulmonary or cardiovascular systems, including asthma
- Children and adolescents (age 6 months-18 years) who are receiving long-term aspirin therapy. (Risk of Reyes Syndrome)
- Women who will be in their second or third trimester of pregnancy during the flu season
- Health care workers providing direct patient care
- Household contacts of children 0-5 months, as well as their out of home caretakers
